Search Movies

GET /search/movie

Search for movies.

Responses application/json

200	Schema Example			collapse all
401	object			
404	page	integer		optional
	results	array[object]	{Movie List Result Object}	optional
	poster_path	string or null		optional
	adult	boolean		optional
	overview	string		optional
	release_date	string		optional
	genre_ids	array[integer]		optional
	id	integer		optional
	original_title	string		optional
	original_language	string		optional
	title	string		optional
	backdrop_path	string or null		optional
	popularity	number		optional
	vote_count	integer		optional
	video	boolean		optional
	vote_average	number		optional
	total_results	integer		optional
	total_pages	integer		optional
	collapse			

Get Images

GET /movie/{movie_id}/images

Get the images that belong to a movie.

Querying images with a `language` parameter will filter the results. If you want to include a fallback language (especially useful for backdrops) you can use the `include_image_language` parameter. This should be a comma seperated value like so: `include_image_language=en,null`.

Responses application/json

200	Schema Example		collapse all
401	object		
404	id	integer	optional
	backdrops	array[object]	optional
	aspect_ratio	number	optional
	file_path	string	optional
	height	integer	optional
	iso_639_1	null or string	optional
	vote_average	integer	optional
	vote_count	integer	optional
	width	integer	optional
	posters	array[object]	optional
	aspect_ratio	number	optional
	file_path	string	optional
	height	integer	optional
	iso_639_1	string or null	optional
	vote_average	integer	optional
	vote_count	integer	optional
	width	integer	optional
	collapse		

Get Latest

GET /movie/latest

Get the most newly created movie. This is a live response and will continuously change.

Responses application/json

Get Now Playing

GET /movie/now_playing

Get a list of movies in theatres. This is a release type query that looks for all movies that have a release type of 2 or 3 within the specified date range.

You can optionally specify a `region` prameter which will narrow the search to only look for theatrical release dates within the specified country.
